This adapter cable can be used where the SOURCE of the USB signal is connected to the MALE USB end. When connected at this end, it will provide for DATA and POWER at ONE of the FEMALE USB ends, and POWER ONLY at the other FEMALE USB end. It will NOT provide or act as a USB splitter or hub. The POWER ONLY lead has a special resistor allowing this split cable to be used with both Apple iPhones(TM), iPads(TM), and Android phones for concurrent charging.

Specifications:

- Two USB FEMALE connectors, ONE USB Male connector
- One is for USB power and data (4 wires terminated),
- Another one for USB power only (2 wires ONLY terminated)
- Resistor installed at charge-only connector allowing for iPhone and Android phone compatibility
- The signal SOURCE must be connected to the MALE USB connector
- RoHS-2 Compliant
