This specialized BNC cable meets the 12G-SDI (Serial Digital Interface) standards to support 12 Gbps, and maximum resolutions to 4Kx2K (2160P30 YUV 4:4:4) at 60Hz. Higher resolutions MAY be possible with suitable hardware compression using your equipment. The 12G-SDI standard is 100% backward compatible with the SD-SDI, ED-SDI, HD-SDI, 3G-SDI, and 6G-SDI specifications (SMPTE ST-2082, 259M, 344M, 292M, 373M, 424M, and the 6G-SDI standard of SMPTE ST-2081), but supports the faster 12Gbps speed needed for tomorrow's 4Kx2K video/audio applications. Using 12G-SDI cabling instead of 6G, HD-SDI, or 3G-SDI provides the future-proofing you need!
