Product Uses

The diagram below shows how the transmitter of this kit may be extended using a Cat5 cable and a three conductor 3.5mm keystone, like our part number 37036. The bulk Cat5 cable connects from the screw terminal connection on the IR distribution block to the 3.5mm keystone. Only three of the eight conductors of the Cat5 cable will be used. The pinout below should be used to make this connection:

IR Distribution Block - 3.5mm keystone

- IR - 3.5mm keystone
- +12VDC - Sleeve (- or G)
- GND - Ring (S or R)
- Signal - Tip (+ or L)
